Key takeaways

1

The list-price ratio climbed from ~101% to a 104.8% three-month average while DOM reduced from a 17.7-day peak to 5.0 day recent minimum. Homes are closing at or above ask, faster.

2

At ~10 closings/month, one high-price sale or outlier can increase the median by hundreds of thousands. Each month can have a big swing, independently.

3

Brokerage share is concentrated. COMPASS and Keller Williams hold ~57% of top-office volume combined.
